# API Documentation

1. Navigate to the settings of your chosen repository and click on "Webhooks".

2. In Payload URL enter the following API:
   https://nyfr8edqnk.execute-api.ap-southeast-1.amazonaws.com/Final/github-webhook-issues

3. For content type, click on the dropdown and pick "Application/JSON"

4. Enter in the secret provided to you in your email. If no secret was provided to you please email: shenyicui@outlook.com

5. For "events to trigger this webhook" select individual events. Unselect "Push" and select "Issues".

6. Create your webhook and navigate to this Google Sheet:
    https://docs.google.com/spreadsheets/d/1G37lTVdQRxUE_ewgEAosN_ZBeNRTPwOsVvea4QdE_I4/edit?usp=sharing

7. Your GitHub Issues should now be syncing with this google sheet
